

# ODOUR CONTROL IN RENDERING

## Benefits & Area of Applications

Ecomaster Render is an advanced solution designed to effectively combat unpleasant odors in various environments. By forming strong chemical bonds with odor molecules, Ecomaster Render encapsulates and neutralizes them, ensuring that these odors are not merely masked but permanently trapped in an aqueous phase. This powerful formulation is particularly effective in managing biological odor emissions from sources such as waste treatment facilities, slaughterhouses, and rendering plants. Ecomaster Render provides a long-lasting solution that is safe for use and environmentally friendly, making it an essential tool for maintaining a pleasant atmosphere in odor-prone industries.

### Benefits of Ecomaster Odour Control in Rendering

- Permanently neutralizes pungent odors within minutes.
- Removes odors from ammonia, hydrogen sulfide, mercaptans, and cooking gas instead of masking them.
- Eliminates smells from rotten rendering waste, organic compounds, and amines in rotting meat and cadavers.
- High-yield concentrate that is easy and safe to use.
- Eco-friendly formulation with no dyes, fragrances, biocides, or harmful ingredients.
- Delivers a durable, long-lasting effect for a smell-free working environment.

### Area of Application

- Rendering Plant
- Meat Bone meal Plants (MBM)
- Bone Meal | Poultry Meal
- Fish Meal | Poultry Fat
- Blood Meal | Feather Meal

### Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

### Packaging

- 1 Kg and 25 Kg Bag
