

# ODOUR CONTROL IN FEED INDUSTRY

## Benefits & Area of Applications

Ecomaster for Odour Control in the Feed Industry forms strong chemical bonds with odour molecules, permanently trapping them in an aqueous phase. Unlike typical masking agents, this advanced solution encapsulates and neutralizes the odour molecules, ensuring long-lasting odour elimination. Ecomaster is highly effective in the feed industry, known for its quick action and eco-friendly composition. It safely neutralizes biological odour emissions from feed production processes, delivering a high-yield concentrate that is not only fast-acting but also environmentally safe.

### Benefits of Ecomaster Odour Control in the Feed Industry

- Permanently encapsulates and neutralizes strong odors within minutes.
- Removes odors from ammonia, hydrogen sulfide, mercaptans, and cooking gas, rather than masking them.
- Eliminates smells from rotten rendering waste, organic compounds, and amines found in rotting meat and cadavers, making it suitable for the feed industry.
- High-yield concentrate formulation that is safe and easy to use.
- Eco-friendly solution with no dyes, fragrances, biocides, or harmful ingredients.
- Provides a durable, long-lasting effect for a smell-free working environment, ensuring effective odor control in the feed industry.

### Area of Application

- Feed Industry | Waste Management Facilities
- Rendering Plants | Food Processing Industries
- Animal Husbandry | Aquaculture
- Municipal Waste Treatment

### Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

### Packaging

- 1 Kg and 25 Kg Bag
