BIOFLOC

Benefits & Area of Applications

Ecomaster Biofloc (Probiotics for Biofloc) is a specialized blend of natural microbes, enzymes, and carbon sources designed to boost feed conversion rates and reduce the presence of harmful pathogens. This probiotic formulation enhances the health and growth of fish and shrimp by improving their digestive efficiency and providing a natural defense against diseases. As a result, farmers can achieve higher yields with lower operational costs while ensuring the well-being of their stock. Ecomaster Biofloc is a key solution for modern, eco-friendly aquaculture systems.

Benefits of Ecomaster Biofloc

- Accelerates the development of protein-rich floc.
- Increases fish growth rate, biomass, and Feed Conversion Ratio (FCR).
- Reduces the activity of Vibrio and pathogenic bacteria.
- Improves feed digestibility and nutrient assimilation.
- Lowers the need for antibiotics.
- Enhances water quality without the need for water exchange.
- Reduces nitrogen toxicity in water.
- Decreases feed requirements as biofloc serves as a natural feed source.
- Eco-friendly product.
- Increases the survivability of aquatic animals.

Area of Application

- Aquaculture | Fish Farming
- Shrimp Farming | Sustainable Aquatic Systems
- Water Quality Management
- Disease Management in Aquatic Species

Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

Packaging

- 1 Kg and 25 Kg Bag
