

AQUA PROBIOTICS

Benefits & Area of Applications

Ecomaster Aqua Probiotics is an innovative formulation that combines beneficial and natural bacteria, enzymes, vitamins, and seaweed extracts, designed specifically for aquaculture. This unique blend is carefully crafted to enhance the digestive capabilities and nutrient assimilation of fish and shrimp, promoting overall health and growth. The selected strains are gut-friendly, ensuring they work harmoniously within the aquatic environment to support the well-being of the organisms.

Benefits of Ecomaster Aqua Probiotics

- Improves feed digestion efficiency.
- Increases nutrient absorption through enzymatic activity.
- Protects the gut from pathogens and boosts immunity.
- Effective in controlling white gut syndrome and white faeces.
- Enhances Feed Conversion Ratio (FCR) and promotes biomass growth.

Area of Application

- Aquaculture
- Livestock Farming
- Animal Nutrition
- Gut Health Management
- Disease Prevention in Animals

Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

Packaging

- 1 Kg and 25 Kg Bag
