

BIO TOILET & SEPTIC TANKS

Benefits & Area of Applications

Ecomaster Bio Toilet bacteria is a consortium blend of specially formulated species and strains of natural and safe bacteria. These bacteria degrade human fecal waste into simpler compounds, the bio-degradation process is set off in the toilet chambers – the bacteria eat up the organic matter (human excreta) and produce methane gas, Carbon Dioxide and water as byproducts, Ecomaster Bio Toilet Bacteria release enzymes that further helps to breakdown the complex proteins into simpler form.

- 1 kg Ecomaster Bio Toilet powder required to commissioning of 1000 liters of digester tank.

Area of application (Bacteria For Bio-Toilet)

- Bio toilets
- Portable toilets
- Community toilets
- Septic tanks

Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

Packaging

- 1 Kg and 25 Kg Bag
