

# AMMONIA CONTROL

## Benefits & Area of Applications

Ecomaster Ammonia Control offers a comprehensive, organic solution for managing ammonia levels in water bodies. Formulated with the natural properties of yucca and a carefully selected blend of beneficial microorganisms, this product effectively breaks down ammonia and other harmful gases, promoting a healthier aquatic environment. Regular application of Ecomaster Ammonia Control introduces specialized deammonifying microbes into the system. These natural bacteria are designed to degrade ammonia and nitrite into non-toxic by-products, thereby enhancing water quality and supporting the overall well-being of fish and shrimp.

### Benefits of Ecomaster Ammonia Control

- Effectively lowers ammonia levels
- Reduces reliance on chemical treatments
- Promotes enhanced growth of fish and shrimp

### Area of Application

- Aquaculture
- Pond and Lake Management
- Wastewater Treatment
- Agricultural Runoff Management
- Recreational Water Bodies
- Stormwater Management
- Public Aquatic Facilities

### Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

### Packaging

- 1 Kg and 25 Kg Bag
