

ecoMaster[®]

DAIRY

Benefits & Area of Applications

Ecomaster Dairy is a highly effective solution designed to address the accumulation of oil, grease, and fats in dairy processing facilities. This specialized bacterial treatment is renowned for its superior quality and performance. Ecomaster Dairy is rigorously tested against various parameters to ensure it meets the highest standards, providing reliable results for the dairy industry. Our product is available in multiple formulations to meet the specific needs and requirements of our clients, ensuring optimal efficiency in effluent treatment.

Benefits of Ecomaster Dairy

- Environmentally friendly microbes.
- Effectively degrade high COD and BOD.
- Break down fats, oils, and grease from dairy products.
- Tolerant of high pH and temperature variations.
- Eliminates foul odors from plants.
- Non-pathogenic and ready to use.
- Contains highly concentrated, active strains of multiple microbes.

Area of Application

- Membrane Bioreactor (MBR)
- Activated Sludge Process
- Sequencing Batch Reactor (SBR)
- Moving Bed Biofilm Reactor (MBBR)
- Extended Aeration System

Physical Properties

- Powder Form
- Off White Colour
- 2 Years of Shelf Life

Packaging

- 1 Kg and 25 Kg Bag
